**Optoma Europe Ltd, 19<sup>th</sup> August 2008** - Optoma will officially launch its Pico Pocket Projector at IFA Berlin 2008.

Location: Hall 26 Stand 117.

Date: 29th August 2008 to 3rd September 2008.

Home Cinema sized viewing from personal media players, mobile phones, PDAs, cameras and gaming devices finally becomes a reality. Optoma, a global leader of award-winning digital projection and display devices, will officially launch possibly the first and probably the smallest palm-sized, self-contained, battery-operated, Pico projector. Based upon the new DLP® Pico chipset it will premier at IFA Berlin; Europe's major consumer electronic show.

Despite being smaller and lighter than many digital cameras or smart phones the Optoma Pico Pocket Projector enables users to share images and videos from their media devices at up to a maximum of 60" – incredible from a device small and light enough to be comfortably carried in a pocket or handbag.

Based around the latest LED illumination advances and DLP® imaging technology, Optoma have used their considerable expertise to produce the Optoma Pico Pocket Projector to combine clear, vivid, high contrast images with a 20,000 hour lamp life, long battery life and simple operation.

The Optoma Pico Projector will be available worldwide in late 2008.
